Meet BlazerNET, the official portal to the UAB community of intranets and key software—and the most reliable source of UAB information for faculty, staff, and students. BlazerNET is a convenient, secure, online platform designed around what you want and need, whether you're a student registering for classes, an employee looking up pay information, or a faculty member who needs quick access to resources—and the more you use it, the more it will grow to offer.

How to log on to BlazerNET:
You can access BlazerNET from any computer on or off campus. Simply visit blazernet.uab.edu or click to the login page from the convenient link on UAB’s main Web site, www.uab.edu.

Signing in is simple; just use your existing BlazerID (username) and strong password. For more information about your BlazerID, visit www.uab.edu/blazerid.

What you need to know:
• What’s a portal?
  A portal is just a way to access something. A portal like BlazerNET is a Web site that you can personalize to access e-mail, class schedules, financial information, and more. Think of it as a locked door; you have the key, and only you get to open it.

• Will BlazerNET replace the UAB Web site (www.uab.edu)?
  No. BlazerNET is designed especially for the internal UAB community. You can find everything from class registration, financial aid, and grading to policies, service center information, and calendars, and much more—all on one secure online platform. All class registration will take place through BlazerNET.

• How do I navigate BlazerNET?
  BlazerNET is organized into nine tabs—Home, Libraries, Research, Courses & Training, Campus Life, Faculty Resources, Employee Resources, Student Resources, and My Stuff—all of which you can personalize to put the information that’s important to you at your fingertips. For tips on personalizing your tabs, click on the “Content/Layout” link to the right of the BlazerNET logo. And, at the upper right corner of the BlazerNET screen you’ll find links to communication tools, including your e-mail account and BlazerNET groups. Groups are online communities for discussion and collaboration.

• Is BlazerNET safe?
  BlazerNET is very secure. As long as you don’t share your BlazerID and strong password, only you can access your personal information.

• What if I have problems with BlazerNET?
  First, click the Help icon in the upper right corner of the BlazerNET screen. If you can’t find what you’re looking for there, contact AskIT by calling 996-5555, sending an e-mail to AskIT@uab.edu, or reporting the problem online at www.uab.edu/askit.
